Abstract

METHOD AND MOBILE STATION FOR AUTOMATIC CREATION OF TALK GROUP

A method of automatic creation of a talk group in a wireless radio communication system (100) comprising a plurality of mobile stations (102—116), said method comprising the steps of: transmitting (200) by a first mobile station (102) an emergency message containing at least its ID and localization data; transmitting (202) by other mobile stations their IDs and localization data in response to said emergency message; creating (206) said talk group by selecting those mobile stations which transmitted their IDs and localization data.
